---

### Projects

#### Personal Portfolio

Explore a curated showcase featuring my skills, projects, and creative endeavors, highlighting diverse talents and innovative solutions across various disciplines and challenges.

#### Swiggy Clone

This Swiggy Clone, named Foodies, was developed using create-react-app, JSX, JavaScript (ES6), CSS, React, React-Router, Redux Toolkit, Swiggy's API, Git for version control, and Vercel for hosting.

#### Netflix Clone

This Netflix Clone, named Chalchitra, was developed using create-react-app, JSX, JavaScript (ES6), Tailwind CSS, React, React-Router, Redux Toolkit, TMDB API, Firebase for authentication, Git for version control, and Vercel for hosting.

#### Ai Brain Landing Page

I had created this landing page by using Html , Css , Javascript , Git repository for tracking all changes I made to files in while building this project. And I had used Vercle for hoisting this project.

---

### Programming Skills

**Proficient :** HTML5 , CSS3 , JavaScript , ReactJS , Tailwind CSS

**Familiar :** React Router, Redux Toolkit , Bootstrap

**Version control :** Git

**Tools :** Visual studio , Canva

---

### Professional Experience

**Web Developer Intern at CodSoft (remote internship)**

June 2024 – July 2024

During my month-long web development internship, I gained practical skills in HTML, CSS, JavaScript, Git, and deployed projects with Vercel. I built a landing page, calculator app, and portfolio site, focusing on responsive design and enhancing UI development and deployment capabilities.

**Resource Coordinator at Mobilise App Lab LLP**

March 2022 – May 2024
